Parcel Lockers

Safe, secure storage with ParcelPoint™ Smart Lockers.

A secure storage solution designed for the modern work environment.

Provide a flexible, secure work environment for your hybrid workforce.

As companies re-evaluate how and where their employees work, they're considering the needs of their hybrid workforce and designing a work environment that's flexible and safe. Traditional, dedicated workstations are being replaced by "hot desking" and collaborative areas, used by a variety of employees. Often, this leaves employees without a secure place to store their personal items.

Easy access that is safe, secure and convenient.

Workplace Day Use for ParcelPoint Smart Lockers offers a user-friendly, self-service way for employees to quickly schedule a locker and access it easily. A personalized barcode or a unique PIN is sent to the user's email and can be used to securely access their locker throughout the day. Automatic notifications are sent – reminding the users to pick up their belongings, thus making the lockers available again.

Smart storage for whenever it is needed.

ParcelPoint Smart Lockers Workplace Day Use is the smart, secure way for your employees and/or guests to temporarily store personal items and work-related equipment. It's a practical solution that provides flexibility and peace of mind during office visits.

ParcelPoint™ Smart Lockers Workplace Day Use

Benefits for your organization:

- Provide a flexible, secure work environment for your employees.
- Minimize lost or stolen employee personal belongings.
- Eliminate lost keys, forgotten combinations and cumbersome manual processes.
- Customize workflows for locker assignments, storage time limits and other administrative capabilities.

Benefits for your employees:

- Easily reserve and access lockers through a secure PIN or barcode.
- Accommodate various-sized personal items, such as laptops, small bags or even travel suitcases with multiple compartment sizes.
- Access locker compartments easily with a built-in audio and visual assistive keypad.
- Gain peace of mind that their personal belongings are securely stored while they are working.

ParcelPoint Smart Lockers can become the multifunctional solution your organization needs.

Today's companies are looking for multiple ways to upgrade and transform their office spaces to a more modern and smarter environment. Workplace Day Use can be used in conjunction with our package and asset delivery to optimize compartment space and deliver more value to your smart locker investment.

Employees will benefit from safe and secure storage while visiting the office. In addition, they gain the convenience of safe, contactless, anytime pick-up of packages and assets through simple software add-ons, all within the same locker bank or with the option to add locker columns for more space.
