

# Safety, security and convenience for the modern workspace.

Flexible, modern technology is key to accommodating today's hybrid workforce. ParcelPoint Smart Lockers, the secure delivery solution from Pitney Bowes, delivers safety, security and convenience no matter how your company scales or needs evolve.

## Parcel pickup

Prompt notifications provide tracking updates for employees, ensuring parcels are safe. All items are secured in a locker until employees are able to pick up, at their convenience.

Operator delivers parcels to lockers, triggering recipient notifications.

Recipient scans the access barcode from their notification at the assigned locker.

The locker opens and the recipient grabs their parcel.

## IT asset management and equipment distribution

Secure, self-service lockers simplify equipment drop off for service or repair, and provide convenient, contactless access for remote employees to pick up equipment or supplies.

IT places repaired, new or loaner equipment into locker, triggering a notification with access barcode.

Employee scans the access barcode from their notification at the assigned locker.

The locker opens and the employee leaves equipment for servicing, or takes the equipment left for them.

## Secure personal storage at the office

Contactless, self-service smart lockers protect personal belongings without the need for keys, locks and inefficient manual processes.

Employee reserves locker, triggering a notification with barcode or PIN to securely access locker throughout the day.

Employee scans the access barcode or PIN to open locker compartment and securely store belongings.

User can access the assigned locker multiple times throughout the reservation period with a quick swipe of the barcode.
